The Microsoft Technology Associate MTA certification is an entry-level certification which serves as a good starting point for students and educators who may eventually progress to the Microsoft Technology Specialist MCTS or higher programs. Simply put, it assesses the foundational knowledge necessary to pursue MCTS, MCITP or MCPD certifications. The certification focuses more on knowledge and a little less on skills. However, the knowledge areas are all based on MS products so you must know those products inside and out. Questions on the general knowledge are relatively easy. Product and technology specific technical questions, however, are way more difficult. This is why we developed this study product - we focus on those difficult topics that involve difficult technical skills. We want you to be able to answer these difficult questions and secure exam success accordingly. Exam 98-365: Windows Server Administration Fundamentals is all about Windows Server 2008. Topics covered include: Understanding Server Installation Understanding Server Roles Understanding Active Directory Understanding Storage Understanding Server Performance Management Understanding Server Maintenance
