Planning, Performing, and Controlling Projects Robert B. Angus, Norman A. Gundersen

This text explores theory and practice in the design and management of technically-oriented projects. It outlines a four-phase systematic approach, and examines its implementation in a real-world case study. The four phases are: the conception phase, the study phase, the design phase and the implementation phase. For each phase, the book considers purpose and goal, activities, definition of the completion of the phase, and exercises.
