Spaces of Interaction, Places for Experience (Synthesis Lectures on Human-Centered Informatics)

David Benyon

Spaces of Interaction, Places for Experience is a book about Human-Computer Interaction (HCI), interaction design (ID) and user experience (UX) in the age of ubiquitous computing. The book explores interaction and experience through the different spaces that contribute to interaction until it arrives at an understanding of the rich and complex places for experience that will be the focus of the next period for interaction design. The book begins by looking at the multilayered nature of interaction and UX—not just with new technologies, but with technologies that are embedded in the world. People inhabit a medium, or rather many media, which allow them to extend themselves, physically, mentally, and emotionally in many directions. The medium that people inhabit includes physical and semiotic material that combine to create user experiences. People feel more or less present in these media and more or less engaged with the content of the media.

From this understanding of people in media, the book explores some philosophical and practical issues about designing interactions. The book journeys through the design of physical space, digital space, information space, conceptual space and social space. It explores concepts of space and place, digital ecologies, information architecture, conceptual blending and technology spaces at work and in the home. It discusses navigation of spaces and how people explore and find their way through environments. Finally the book arrives at the concept of a blended space where the physical and digital are tightly interwoven and people experience the blended space as a whole. The design of blended spaces needs to be driven by an understanding of the correspondences between the physical and the digital, by an understanding of conceptual blending and by the desire to design at a human scale.

There is no doubt that HCI and ID are changing. The design of “microinteractions” remains important, but there is a bigger picture to consider. UX is spread across devices, over time and across physical spaces. The commingling of the physical and the digital in blended spaces leads to new social spaces and new conceptual spaces. UX concerns the navigation of these spaces as much as it concerns the design of buttons and screens for apps. By taking a spatial perspective on interaction, the book provides new insights into the evolving nature of interaction design.

Table of Contents: Preface / Spaces of Interaction / The Medium of Interaction / Physical Space / Digital Space / Information Space / Conceptual Space / Social Space / Navigating Space / Blended Spaces / Places for Experience / References / Author Biography

From reader reviews:

Julius Montanez:

The book Spaces of Interaction, Places for Experience (Synthesis Lectures on Human-Centered Informatics) can give more knowledge and also the precise product information about everything you want. Why must we leave a very important thing like a book Spaces of Interaction, Places for Experience (Synthesis Lectures on Human-Centered Informatics)? A few of you have a different opinion about reserve. But one aim which book can give many data for us. It is absolutely correct. Right now, try to closer along with your book. Knowledge or information that you take for that, you can give for each other; you could share all of these. Book Spaces of Interaction, Places for Experience (Synthesis Lectures on Human-Centered Informatics) has simple shape however you know: it has great and big function for you. You can appearance the enormous world by open and read a guide. So it is very wonderful.

Sharyl Nettles:

This Spaces of Interaction, Places for Experience (Synthesis Lectures on Human-Centered Informatics) are usually reliable for you who want to be considered a successful person, why. The main reason of this Spaces of Interaction, Places for Experience (Synthesis Lectures on Human-Centered Informatics) can be among the great books you must have is definitely giving you more than just simple examining food but feed anyone with information that maybe will shock your prior knowledge. This book will be handy, you can bring it everywhere and whenever your conditions in the e-book and printed versions. Beside that this Spaces of Interaction, Places for Experience (Synthesis Lectures on Human-Centered Informatics) forcing you to have an enormous of experience for example rich vocabulary, giving you tryout of critical thinking that we know it useful in your day task. So , let's have it and luxuriate in reading.

Rigoberto Hamilton:

A lot of people always spent their particular free time to vacation or even go to the outside with them household or their friend. Do you realize? Many a lot of people spent many people free time just watching TV, or playing video games all day long. If you would like try to find a new activity that's look different you can read the book. It is really fun for yourself. If you enjoy the book that you read you can spent the whole day to reading a book. The book Spaces of Interaction, Places for Experience (Synthesis Lectures on Human-Centered Informatics) it is extremely good to read. There are a lot of those who recommended this book. These folks were enjoying reading this book. In case you did not have enough space to bring this book you can buy the actual e-book. You can m0ore effortlessly to read this book out of your smart phone. The price is not very costly but this book possesses high quality.

Francisco Morgan:

That publication can make you to feel relax. This specific book Spaces of Interaction, Places for Experience (Synthesis Lectures on Human-Centered Informatics) was colourful and of course has pictures on there. As

we know that book Spaces of Interaction, Places for Experience (Synthesis Lectures on Human-Centered Informatics) has many kinds or variety. Start from kids until young adults. For example Naruto or Private investigator Conan you can read and feel that you are the character on there. Therefore not at all of book are make you bored, any it offers you feel happy, fun and unwind. Try to choose the best book for yourself and try to like reading that will.
