The Logical Thinking Process: A Systems Approach to Complex Problem Solving

H. William Dettmer

The Logical Thinking Process: A Systems Approach to Complex Problem Solving H. William Dettmer A major rewrite of Dettmer's classic Goldratt's Theory of Constraints, this new edition presents a whole new approach to building and applying logic trees. The logical thinking process referred to in the title is nothing less than a broadly applicable, systems-level approach to policy analysis.

Dettmer has streamlined the process of constructing the logic trees while simultaneously ensuring that the results are more logically sound and closer representations of reality than ever before. He explains an easier, more logically sound way to integrate Current Reality Trees with Evaporating Clouds. His new version of the thinking process "retires" the Transition Tree in favor of the marriage of a more detailed Prerequisite Tree and critical chain project management.

This book contains new examples of logic trees from a variety of real-world applications. Most of the diagrams and illustrations are new and improved. Explanations and procedures for constructing the logic trees are considerably simplified.

Completely new to this edition is a unique graphical software application - Transformation Logic Trees, designed primarily to create thinking process logic trees and only secondarily for other flowcharting uses. Appendix J in the book provides more information on how to download a trial version and use the software.

From reader reviews:

Kerry Diaz:

Information is provisions for those to get better life, information presently can get by anyone at everywhere. The information can be a know-how or any news even restricted. What people must be consider when those information which is inside former life are hard to be find than now's taking seriously which one is suitable to believe or which one the actual resource are convinced. If you find the unstable resource then you understand it as your main information there will be huge disadvantage for you. All those possibilities will not happen with you if you take The Logical Thinking Process: A Systems Approach to Complex Problem Solving as the daily resource information.

Gary Flint:

Spent a free the perfect time to be fun activity to perform! A lot of people spent their leisure time with their family, or their very own friends. Usually they accomplishing activity like watching television, going to beach, or picnic within the park. They actually doing same task every week. Do you feel it? Do you wish to something different to fill your own personal free time/ holiday? May be reading a book can be option to fill your free time/ holiday. The first thing you will ask may be what kinds of e-book that you should read. If you want to consider look for book, may be the e-book untitled The Logical Thinking Process: A Systems Approach to Complex Problem Solving can be very good book to read. May be it is usually best activity to you.

George Clark:

Your reading 6th sense will not betray you, why because this The Logical Thinking Process: A Systems Approach to Complex Problem Solving e-book written by well-known writer who knows well how to make book that can be understand by anyone who also read the book. Written within good manner for you, still dripping wet every ideas and publishing skill only for eliminate your personal hunger then you still doubt The Logical Thinking Process: A Systems Approach to Complex Problem Solving as good book not only by the cover but also through the content. This is one publication that can break don't judge book by its cover, so do you still needing a different sixth sense to pick this specific!? Oh come on your examining sixth sense already alerted you so why you have to listening to another sixth sense.

Paul Andrews:

As a scholar exactly feel bored to reading. If their teacher asked them to go to the library or to make summary for some guide, they are complained. Just tiny students that has reading's heart and soul or real their pastime. They just do what the instructor want, like asked to the library. They go to generally there but nothing reading significantly. Any students feel that reading through is not important, boring and also can't see colorful images on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, many ways to reach

Chinese's country. Therefore this The Logical Thinking Process: A Systems Approach to Complex Problem Solving can make you sense more interested to read.
