Epidemiology (Statistics for Biology and Health)

Klaus Krickeberg, Van Trong Pham, Thi My Hanh Pham

Epidemiology (Statistics for Biology and Health) Klaus Krickeberg, Van Trong Pham, Thi My Hanh Pham

This book is meant for adoption in first courses on epidemiology in Medical Schools and Faculties of Public Health in developing and transition countries and in workshops in these countries, taught for example by members of international organizations. It is also suitable for parallel or second reading within curricula in developed countries and for teaching epidemiology in a Master's programme on "International Health". The book will enable any lecturer to compose his or her introductory courses on epidemiology by selecting the material deemed appropriate. It will provide a solid foundation for more advanced teaching. The intended readership consists in the first place of general medical students; students following the programme "Preventive Physician" that runs parallel to general medical studies in some countries; students starting to specialize in Public Health; and lecturers in epidemiology. The book can also serve well as an introduction into epidemiology for anybody else interested in this field, for example staff of health institutions. Examples and practical work are taken from the present situation of health in Vietnam, which can easily be adapted to any other developing or transition country.

From reader reviews:

Amy Cason:

The book Epidemiology (Statistics for Biology and Health) can give more knowledge and also the precise product information about everything you want. Why then must we leave a very important thing like a book Epidemiology (Statistics for Biology and Health)? A few of you have a different opinion about publication. But one aim that book can give many info for us. It is absolutely correct. Right now, try to closer along with your book. Knowledge or data that you take for that, it is possible to give for each other; you can share all of these. Book Epidemiology (Statistics for Biology and Health) has simple shape but you know: it has great and massive function for you. You can appear the enormous world by open up and read a reserve. So it is very wonderful.

Deborah Ellefson:

Here thing why this specific Epidemiology (Statistics for Biology and Health) are different and trustworthy to be yours. First of all studying a book is good but it depends in the content of the usb ports which is the content is as delicious as food or not. Epidemiology (Statistics for Biology and Health) giving you information deeper and in different ways, you can find any book out there but there is no guide that similar with Epidemiology (Statistics for Biology and Health). It gives you thrill reading through journey, its open up your own eyes about the thing this happened in the world which is maybe can be happened around you. It is easy to bring everywhere like in playground, café, or even in your technique home by train. When you are having difficulties in bringing the published book maybe the form of Epidemiology (Statistics for Biology and Health) in e-book can be your choice.

Dorothy Delarosa:

It is possible to spend your free time you just read this book this guide. This Epidemiology (Statistics for Biology and Health) is simple to deliver you can read it in the playground, in the beach, train and soon. If you did not include much space to bring the actual printed book, you can buy typically the e-book. It is make you simpler to read it. You can save often the book in your smart phone. So there are a lot of benefits that you will get when one buys this book.

Clyde King:

Is it an individual who having spare time after that spend it whole day through watching television programs or just laying on the bed? Do you need something new? This Epidemiology (Statistics for Biology and Health) can be the reply, oh how comes? The new book you know. You are so out of date, spending your time by reading in this completely new era is common not a nerd activity. So what these ebooks have than the others?
