**Congestion Control in Computer Networks: Theory, Protocols and Applications (Distributed, Cluster and Grid Computing)** Jianxin Wang

Computer networks play an important role on connecting resources and people. The tremendous growth of the internet and the advances of computer technology have been pushing forward computer networks for high speed and broad bandwidth. As the internet becomes increasingly heterogeneous, the issue of congestion control becomes ever more important. The large increase in traffic demands and the relentless demand for network capacity have produced a need for new flexible types of congestion control. This book reviews the background and concepts of internet congestion control and gives an overview of the state-of-the-art in congestion control research.

### **From reader reviews:**

#### **Raymond Harris:**

Now a day people who Living in the era exactly where everything reachable by interact with the internet and the resources included can be true or not call for people to be aware of each details they get. How many people to be smart in having any information nowadays? Of course the answer is reading a book. Reading through a book can help individuals out of this uncertainty Information specially this Congestion Control in Computer Networks: Theory, Protocols and Applications (Distributed, Cluster and Grid Computing) book because book offers you rich info and knowledge. Of course the details in this book hundred per cent guarantees there is no doubt in it as you know.

#### **Vivian Nava:**

The experience that you get from Congestion Control in Computer Networks: Theory, Protocols and Applications (Distributed, Cluster and Grid Computing) may be the more deep you digging the information that hide inside words the more you get thinking about reading it. It does not mean that this book is hard to understand but Congestion Control in Computer Networks: Theory, Protocols and Applications (Distributed, Cluster and Grid Computing) giving you joy feeling of reading. The author conveys their point in particular way that can be understood by simply anyone who read the idea because the author of this book is well-known enough. This particular book also makes your vocabulary increase well. So it is easy to understand then can go to you, both in printed or e-book style are available. We recommend you for having this specific Congestion Control in Computer Networks: Theory, Protocols and Applications (Distributed, Cluster and Grid Computing) instantly.

#### **Ryan Moore:**

This Congestion Control in Computer Networks: Theory, Protocols and Applications (Distributed, Cluster and Grid Computing) tend to be reliable for you who want to be a successful person, why. The key reason why of this Congestion Control in Computer Networks: Theory, Protocols and Applications (Distributed, Cluster and Grid Computing) can be one of the great books you must have will be giving you more than just simple studying food but feed you with information that perhaps will shock your earlier knowledge. This book is handy, you can bring it everywhere you go and whenever your conditions in e-book and printed types. Beside that this Congestion Control in Computer Networks: Theory, Protocols and Applications (Distributed, Cluster and Grid Computing) giving you an enormous of experience like rich vocabulary, giving you trial of critical thinking that we all know it useful in your day activity. So , let's have it and luxuriate in reading.

#### **Charlsie Sprouse:**

Spent a free a chance to be fun activity to accomplish! A lot of people spent their leisure time with their family, or their particular friends. Usually they performing activity like watching television, about to beach,

or picnic inside the park. They actually doing same every week. Do you feel it? Will you something different to fill your own free time/ holiday? Could possibly be reading a book may be option to fill your cost-free time/ holiday. The first thing that you will ask may be what kinds of book that you should read. If you want to try look for book, may be the reserve untitled Congestion Control in Computer Networks: Theory, Protocols and Applications (Distributed, Cluster and Grid Computing) can be fine book to read. May be it may be best activity to you.
