## New Trends in Green Chemistry V.K. Ahluwalia, M. Kidwai

Organic chemistry has played a vital role in the development of diverse molecules which are used in medicines, agrochemicals and polymers. Most of the chemicals are produced on an industrial scale. The industrial houses adopt a synthesis for a particular molecule which should be cost-effective. No attention is paid to avoid the release of harmful chemicals in the atmosphere, land and sea. During the past decade special emphasis has been made towards green synthesis which circumvents the above problems. Prof. V. K. Ahluwalia and Dr. M. Kidwai have made a sincere effort in this direction. This book discusses the basic principles of green chemistry incorporating the use of green reagents, green catalysts, phase transfer catalysis, green synthesis using microwaves, ultrasound and biocatalysis in detail. Special emphasis is given to liquid phase reactions and organic synthesis in the solid phase. I must congratulate both the authors for their pioneering efforts to write this book. Careful selection of various topics in the book will serve the rightful purpose for the chemistry community and the industrial houses at all levels. PROF. JAVED IQBAL, PhD, FNA Distinguished Research Scientist & Head Discovery Research Dr. Reddy's Laboratories Ltd.

### **From reader reviews:**

#### **Gerald Dews:**

Now a day individuals who Living in the era just where everything reachable by connect with the internet and the resources in it can be true or not demand people to be aware of each facts they get. How many people to be smart in having any information nowadays? Of course the solution is reading a book. Looking at a book can help people out of this uncertainty Information specifically this New Trends in Green Chemistry book as this book offers you rich details and knowledge. Of course the info in this book hundred % guarantees there is no doubt in it you may already know.

#### **Michelle Porter:**

New Trends in Green Chemistry can be one of your beginner books that are good idea. We recommend that straight away because this reserve has good vocabulary that will increase your knowledge in language, easy to understand, bit entertaining but nevertheless delivering the information. The copy writer giving his/her effort to put every word into delight arrangement in writing New Trends in Green Chemistry however doesn't forget the main level, giving the reader the hottest and also based confirm resource info that maybe you can be one among it. This great information can certainly drawn you into completely new stage of crucial considering.

#### **Theo Garcia:**

Reading a book to get new life style in this season; every people loves to go through a book. When you learn a book you can get a great deal of benefit. When you read publications, you can improve your knowledge, simply because book has a lot of information in it. The information that you will get depend on what kinds of book that you have read. In order to get information about your review, you can read education books, but if you want to entertain yourself you can read a fiction books, these us novel, comics, in addition to soon. The New Trends in Green Chemistry provide you with new experience in examining a book.

#### **Stephanie Dillard:**

Many people spending their moment by playing outside having friends, fun activity along with family or just watching TV all day every day. You can have new activity to spend your whole day by reading a book. Ugh, think reading a book can definitely hard because you have to take the book everywhere? It fine you can have the e-book, delivering everywhere you want in your Cell phone. Like New Trends in Green Chemistry which is keeping the e-book version. So , why not try out this book? Let's notice.
