Physical Chemistry for the Chemical and Biochemical Sciences

Physical Chemistry for the Chemical and Biochemical Sciences

By providing an applied and modern approach, this volume will help readers understand the value and relevance of studying case studies and reviews on chemical and biochemical sciences. Presenting a wide-ranging view of current developments in applied methodologies in chemical and biochemical physics research, the papers in this collection, all written by highly regarded experts in the field, examine various aspects of chemical and biochemical physics and experimentation.

In the first section of this volume, many topics are covered, such as trends in polymeric gas separation membranes, trends in polymer/organoclay nanocomposites, synthesis of the hybrid metal-polymer nanocomposite, oxidation of polypropylene-graphite nanocomposites, and investigation on the cleaning process of gas emissions. In section two, several case studies and reviews in biochemical sciences are reported.
