**Introduction to Cryptography (Undergraduate Texts in Mathematics)** Johannes Buchmann

Cryptography is a key technology in electronic security systems. Modern cryptographic techniques have many uses, such as to digitally sign documents, for access control, to implement electronic money, and for copyright protection. Because of these important uses it is necessary that users be able to estimate the efficiency and security of cryptographic techniques. It is not sufficient for them to know only how the techniques work. This book is written for readers who want to learn about modern cryptographic algorithms and their mathematical foundation but who do not have the necessary mathematical background. It is my goal to explain the basic techniques of modern cryptography, including the necessary mathematical results from linear algebra, algebra, number theory, and probability theory. I assume only basic mathematical knowledge. The book is based on courses in cryptography that I have been teaching at the Technical University, Darmstadt, since 1996. I thank all students who attended the courses and who read the manuscript carefully for their interest and support. In particular, I would like to thank Harald Baier, Gabi Barking, Manuel Breuning, Sa- fuat Hamdy, Birgit Henhapl, Michael Jacobson (who also corrected my English), Andreas Kottig, Markus Maurer, Andreas Meyer, Stefan v vi Preface Neis, Sachar Paulus, Thomas Pfahler, Marita Skrobic, Edlyn Thske, Patrick Theobald, and Ralf-Philipp Weinmann. I also thank the staff at Springer-Verlag, in particular Martin Peters, Agnes Herrmann, Claudia Kehl, Ina Lindemann, and Thrry Kornak, for their support in the preparation of this book.

### **From reader reviews:**

#### **Robert Johnson:**

What do you concentrate on book? It is just for students because they're still students or the item for all people in the world, the particular best subject for that? Simply you can be answered for that question above. Every person has distinct personality and hobby for each other. Don't to be pushed someone or something that they don't wish do that. You must know how great and also important the book *Introduction to Cryptography (Undergraduate Texts in Mathematics)*. All type of book could you see on many solutions. You can look for the internet solutions or other social media.

#### **Debra Unger:**

Book is to be different for each and every grade. Book for children till adult are different content. As we know that book is very important for us. The book *Introduction to Cryptography (Undergraduate Texts in Mathematics)* was making you to know about other information and of course you can take more information. It is extremely advantages for you. The publication *Introduction to Cryptography (Undergraduate Texts in Mathematics)* is not only giving you far more new information but also to get your friend when you sense bored. You can spend your spend time to read your publication. Try to make relationship with the book *Introduction to Cryptography (Undergraduate Texts in Mathematics)*. You never experience lose out for everything should you read some books.

#### **Robert Mangino:**

Here thing why this particular *Introduction to Cryptography (Undergraduate Texts in Mathematics)* are different and reputable to be yours. First of all studying a book is good however it depends in the content of computer which is the content is as delightful as food or not. *Introduction to Cryptography (Undergraduate Texts in Mathematics)* giving you information deeper including different ways, you can find any publication out there but there is no reserve that similar with *Introduction to Cryptography (Undergraduate Texts in Mathematics)*. It gives you thrill studying journey, its open up your current eyes about the thing this happened in the world which is probably can be happened around you. It is possible to bring everywhere like in park your car, café, or even in your way home by train. In case you are having difficulties in bringing the printed book maybe the form of *Introduction to Cryptography (Undergraduate Texts in Mathematics)* in e-book can be your alternative.

#### **Alexandra Stafford:**

Do you like reading a publication? Confuse to looking for your chosen book? Or your book was rare? Why so many problem for the book? But any kind of people feel that they enjoy for reading. Some people likes looking at, not only science book but in addition novel and *Introduction to Cryptography (Undergraduate Texts in Mathematics)* or maybe others sources were given information for you. After you know how the truly amazing a book, you feel wish to read more and more. Science guide was created for teacher or perhaps

students especially. Those textbooks are helping them to include their knowledge. In other case, beside science guide, any other book likes *Introduction to Cryptography (Undergraduate Texts in Mathematics)* to make your spare time more colorful. Many types of book like here.
