**Is There Anybody Out There?** Ali Sabra

Is there anybody out there? Or are we alone in the universe?

Written in mid-2011 and expanded in fall 2013, this book delves into the possibility of life existing outside of Earth in the form of a quick read.

Topics discussed include:

- Mars and Europa as possible candidates for harboring life.
- Extra-solar planets as potential Earth-like planets
- Extremophiles and the affect of their existence on the search for extraterrestrial life
- The Drake equation
- Rare Earth hypothesis
- Fermi Paradox
- Panspermia

The book also examines the hypothesis, dubbed as the ancient astronaut hypothesis, which states that Earth might have been visited allegedly by extraterrestrial civilizations in its past.

So, is there really anybody out there?
