## **Life Cycle Assessment (LCA) - Quo vadis? (Themenhefte Schwerpunktprogramm Umwelt)**

LCA - Quo vadis? discusses overarching topics, new developments and major problems of Life Cycle Assessment (LCA), and compares LCA with site-specific environmental management. The text profits from two years of interdisciplinary, coordinated research activities of the Priority Programme Environment of the Swiss National Science Foundation.

How should system boundaries of a product life cycle be drawn? ·

How can environmental interventions be allocated to products? ·

How are background inventory data collected and used? ·

How can imprecision in the LCA method be ascertained and checked? ·

How can relevant environmental interventions be distinguished from irrelevant ones? ·

What requirements should a software tool for LCA meet?§ A concept of site-specific LCA is proposed in response to criticism of the current approach of LCA. Furthermore, managerial eco-controlling - the emerging method of site-specific environmental management - is discussed. The book concludes with an outlook of possible paths in the future development of LCA.
