Fly by Wire Aircraft: Fighters, Drones, and Airliners

Dr. Jon Schiller PhD

Fly by Wire Aircraft: Fighters, Drones, and Airliners Dr. Jon Schiller PhD

Your author designed Guidance and Control Systems for advanced military aircraft for two decades in the 1980's. He was the designer of the first Fly-By-Wire Aircraft (e.g., F111) which used a Dither Self-Adaptive Control System for adjusting the Flight Control Parameters during Terrain Following Missions or High Altitude Missions. I noted the success Fly by Wire Drones were having in destroying Al-Qaeda Terrorists in Pakistan and Yemen. This book is based on your author's knowledge of fly by wire aircraft and information obtained by sifting thru Internet information. There has been a true revolution using Fly by Wire and Dither Adaptive techniques in all new flying machines. The aircraft of today use nanotechnology computers and sensors for the software in private aircraft, military fighters, and airliners.
