Multimodal Surveillance: Sensors, Algorithms, and Systems

Multimodal Surveillance: Sensors, Algorithms, and Systems

Multimodal surveillance is the next-generation of surveillance technology, combining traditional video and audio surveillance with state-of-the-art sensors. These systems can identify at great distances approaching vehicles or scan crowds of people to pinpoint a specific individual. Once solely used by the military, they are becoming more widely used by law enforcement, business, and even high-end homeowners. This cutting-edge resource brings together the field's leading experts who guide researchers, designers, engineers, and developers through this multifaceted technology. It discusses the latest high-end sensors for extremely accurate surveillance, as well as low-cost sensing solutions. Designers get insight into new powerful algorithms that integrate sensor data to provide meaningful information. Engineers and developers benefit from an in-depth examination of architectures, performance, and systems evaluation.

From reader reviews:

Linda Banks:

Often the book Multimodal Surveillance: Sensors, Algorithms, and Systems has a lot details on it. So when you read this book you can get a lot of advantage. The book was written by the very famous author. The writer makes some research before write this book. This kind of book very easy to read you can obtain the point easily after scanning this book.

Darryl Payton:

Playing with family in a very park, coming to see the coastal world or hanging out with close friends is thing that usually you will have done when you have spare time, after that why you don't try point that really opposite from that. Just one activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Multimodal Surveillance: Sensors, Algorithms, and Systems, it is possible to enjoy both. It is good combination right, you still want to miss it? What kind of hang type is it? Oh come on its mind hangout fellas. What? Still don't buy it, oh come on its known as reading friends.

Lionel Huggins:

In this period of time globalization it is important to someone to get information. The information will make you to definitely understand the condition of the world. The healthiness of the world makes the information simpler to share. You can find a lot of sources to get information example: internet, newspaper, book, and soon. You can view that now, a lot of publisher that will print many kinds of book. The actual book that recommended to you personally is Multimodal Surveillance: Sensors, Algorithms, and Systems this publication consist a lot of the information from the condition of this world now. This specific book was represented just how can the world has grown up. The dialect styles that writer require to explain it is easy to understand. The particular writer made some research when he makes this book. Here is why this book suited all of you.

Ashley Johnson:

That e-book can make you to feel relax. This book Multimodal Surveillance: Sensors, Algorithms, and Systems was colourful and of course has pictures around. As we know that book Multimodal Surveillance: Sensors, Algorithms, and Systems has many kinds or variety. Start from kids until teens. For example Naruto or Private eye Conan you can read and think that you are the character on there. So , not at all of book usually are make you bored, any it offers up you feel happy, fun and unwind. Try to choose the best book for you and try to like reading that will.
